

Toledo Solar Modules

Application Note Two Piece Clip and Module Support Racking

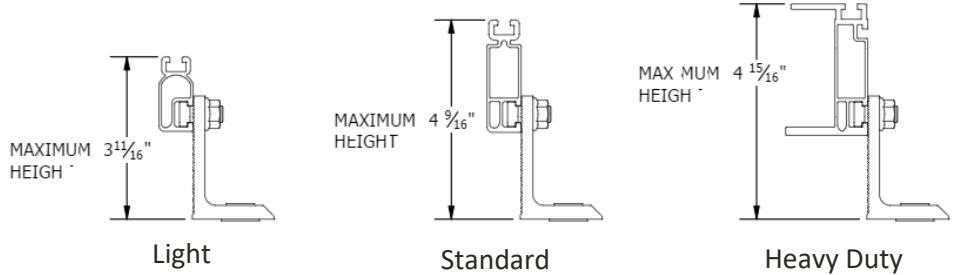

This document provides examples of support racking compatible with approved two piece mounting clips for use with all Toledo Solar Modules. This note does not provide recommendations or make evaluations on racking, the final system design or loading requirements. Absence from the document does not indicate that the racking is incompatible, only that the racking has not been evaluated by Toledo Solar.

It is the responsibility of the installer to insure the T-nuts/bolts are compatible with mounting support rails.

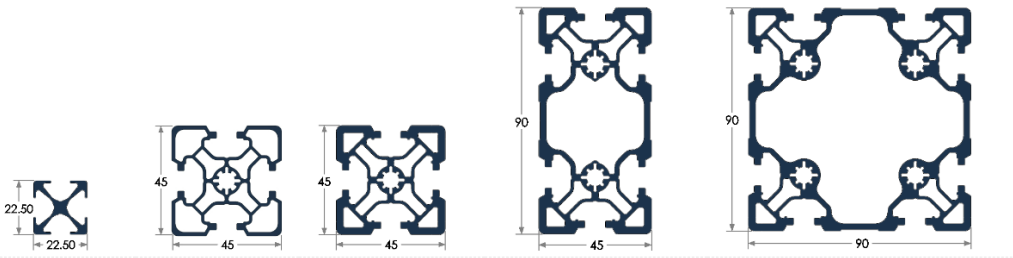

Toledo Solar approved two-piece mounting clips are compatible with most slotted support rails. Including the following:

IronRidge XR Series Rails

UNIRAC Solar Mount

T-slot extruded aluminum profiles by Vention and 80/20
